

HOW TO TAKE OR SELECT YOUR BILL PHOTO

The following tips apply to whether you will take a selfie, someone will do it for you or if you simply choose a previously taken photo:

01- Your face should be the main reason for the photo, so it will have to occupy a large surface in the picture.

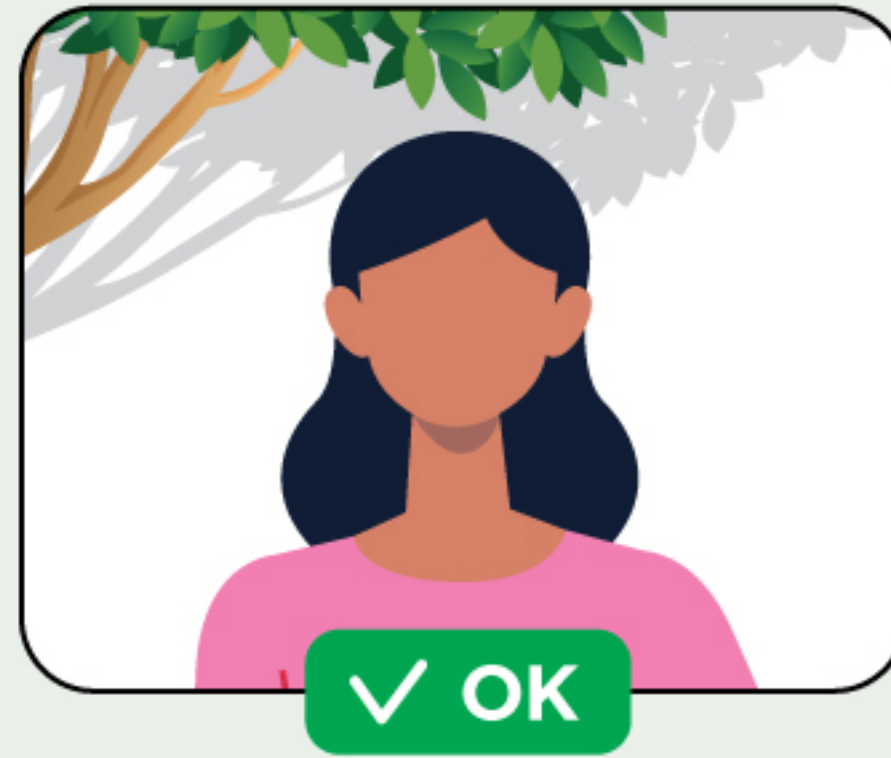

02- Take care of not cutting your face or your hair off the picture.

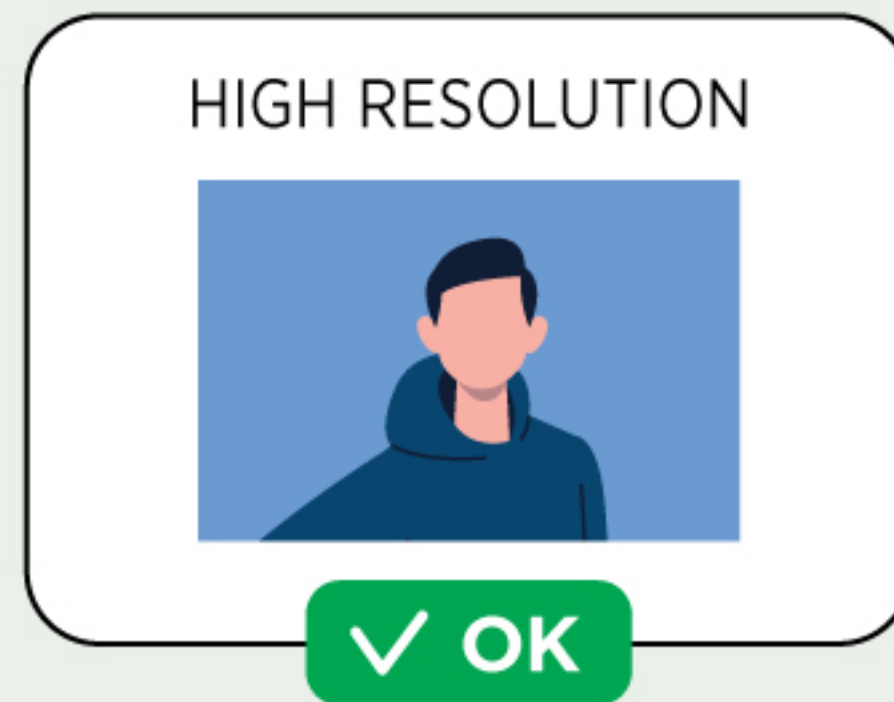

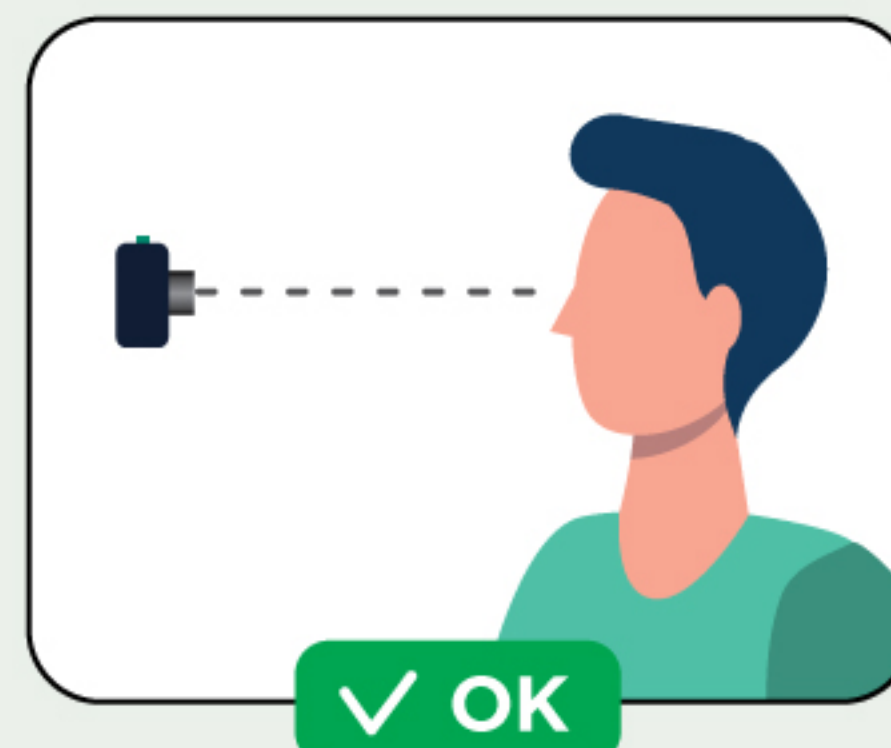

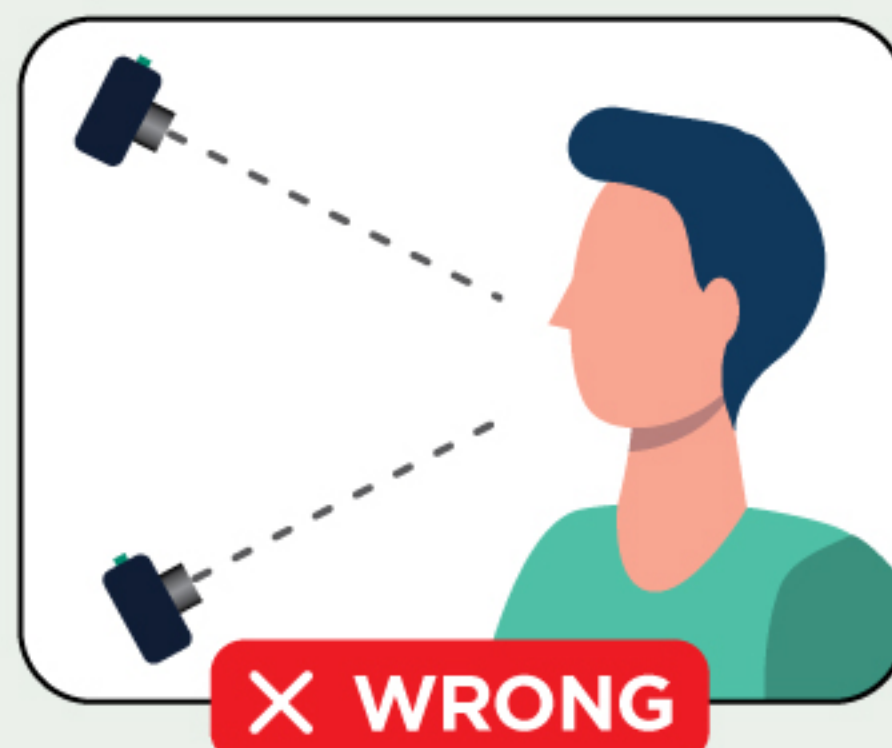

03- Your face should be properly illuminated, without the interference of shadows from external objects.

04- The size or resolution of your photo should be as wide as possible. (Minimum suggested size: 3000 pixels x 2000 pixels).

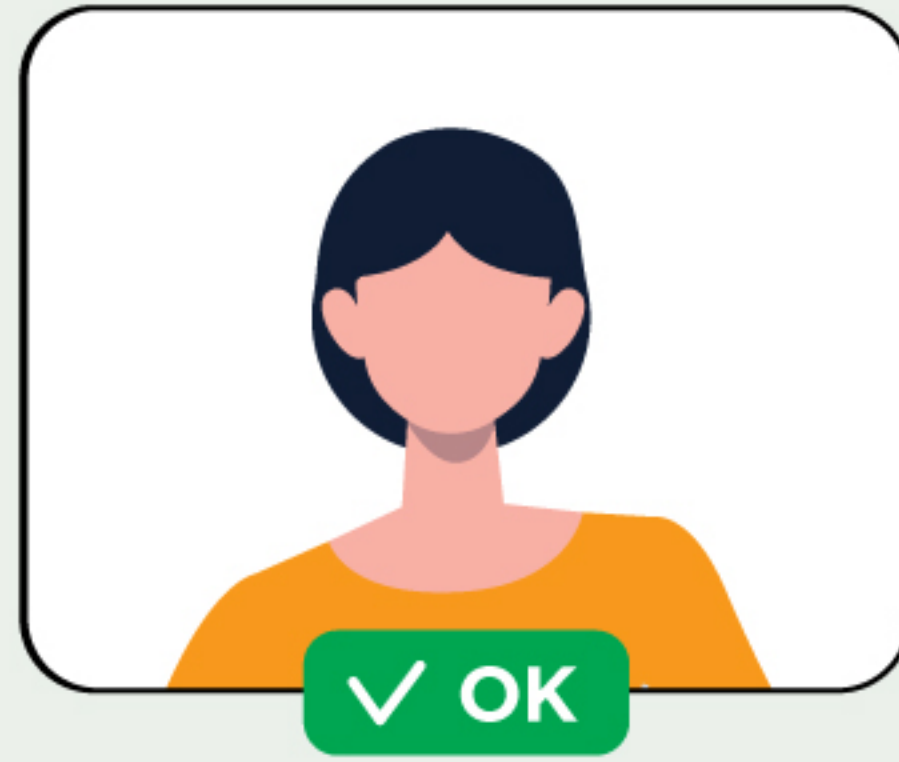

05- The photo should be taken at your eyes level.

06- Be careful that no external element covers the fullness of your face (not even your own hands).

07- Do not worry about your surroundings or background, as it will be edited in the picture for your customized bill.
